

## HOW TO USE THIS INSTALL GUIDE

- 1** Open the Bookmarks menu and find your vehicle OR scroll down until you find the install guide for your vehicle.
- 2** Print only the pages for your vehicle using the advanced options in the Print menu.
- 3** Install your Maestro RR according to the guide for your vehicle.

## WARNING

Pressing the printer icon or “quick printing” this document will print all of the guides in this compilation.

# INSTALL GUIDE CHRYSLER 300 BASE 2005-2007

RETAINS STEERING WHEEL CONTROLS, UCONNECT, UCONNECT BLUETOOTH, AND MORE!

#### PRODUCTS REQUIRED

iDatalink Maestro RR Radio Replacement Interface  
iDatalink Maestro CH2 Installation Harness

#### OPTIONAL ACCESSORIES

None

#### PROGRAMMED FIRMWARE

ADS-RR(SR)-CHR01-DS

NOTICE: Automotive Data Solutions Inc. (ADS) recommends having this installation performed by a certified technician. Logos and trademarks used here in are the properties of their respective owners.

# WELCOME

Congratulations on the purchase of your iDatalink Maestro RR Radio replacement solution. You are now a few simple steps away from enjoying your new car radio with enhanced features.

Before starting your installation, please ensure that your iDatalink Maestro module is programmed with the correct firmware for your vehicle and that you carefully review the Installation Diagram and Vehicle Wire Reference Chart.

**Please note that Maestro RR will only retain functionalities that were originally available in the vehicle.**

# NEED HELP?

## DURING INSTALLATION

Installation Instructions	<b>3</b>
Wiring Diagram	<b>4</b>
Vehicle Wire Reference Chart	<b>5</b>
Radio Wire Reference Chart	<b>6</b>

# INSTALLATION INSTRUCTIONS

## STEP 1

- Remove the factory radio.
- Access the main 22 pin factory radio connector **(2.1)** and determine if you have a factory amplifier.

**If you have wires in PIN 7, 8, 9 and 10, you don't have a factory amplifier.**

**If you don't have wires in PIN 7, 8, 9 and 10, you have a factory amplifier.**

Fig. 2.1

- Unbox the aftermarket radio and locate its main harness.
- Connect the wires shown on the next page from aftermarket radio main harness to the CH2 T-harness and match the wire functions.

## STEP 2

- Connect the factory harness to the CH2 T-harness.

## STEP 3

- Access the OBDII connector located under the driver side dashboard.
- Connect the BROWN /RED wire of the CH2 T-harness to the wire located at pin 6 of the OBDII connector. (See the vehicle wire chart reference for wire colors)
- Connect the BROWN /YELLOW wire of the CH2 T-harness to the wire located at pin 14 of the OBDII connector. (See the vehicle wire chart reference for wire colors)

## STEP 4

- Plug the aftermarket radio harnesses into the aftermarket radio.
- Plug the Data cable to the data port of the aftermarket radio.
- Insert the Audio cable into the iDataLink 3.5 mm audio jack of the aftermarket radio.

## STEP 5

- Connect all the harnesses to the Maestro RR module then proceed to module setup.

**The module is now ready to be used.**

**Insert the aftermarket radio in the dashboard housing and test all the functionalities.**

**Reassemble the dashboard carefully.**

### TROUBLESHOOTING TIPS:

- To reset the module back its factory settings, turn the key to the OFF position then disconnect all connectors from the module. Press and hold the module's programming button and connect all the connectors back to the module. Wait, the module's LED will flash RED rapidly (this may take up to 10 seconds). Release the programming button. Wait, the LED will turn solid GREEN for 2 seconds.

# WELCOME

Congratulations on the purchase of your iDatalink Maestro RR Radio replacement solution. You are now a few simple steps away from enjoying your new car radio with enhanced features.

Before starting your installation, please ensure that your iDatalink Maestro module is programmed with the correct firmware for your vehicle and that you carefully review the Installation Diagram and Vehicle Wire Reference Chart.

**Please note that Maestro RR will only retain functionalities that were originally available in the vehicle.**

## DURING INSTALLATION

Installation Instructions	<b>3</b>
Wiring Diagram	<b>4</b>
Vehicle Wire Reference Chart	<b>5</b>
Radio Wire Reference Chart	<b>6</b>

# INSTALLATION INSTRUCTIONS

## STEP 1

- Remove the factory radio.
- Access the main 22 pin factory radio connector **(2.1)** and determine if you have a factory amplifier.

**If you have wires in PIN 7, 8, 9 and 10, you don't have a factory amplifier.**

**If you don't have wires in PIN 7, 8, 9 and 10, you have a factory amplifier.**

Fig. 2.1

- Unbox the aftermarket radio and locate its main harness.
- Connect the wires shown on the next page from aftermarket radio main harness to the CH2 T-harness and match the wire functions.

## STEP 2

- Connect the factory harness to the CH2 T-harness.

## STEP 3

- Access the OBDII connector located under the driver side dashboard.
- Connect the BROWN /RED wire of the CH2 T-harness to the wire located at pin 6 of the OBDII connector. (See the vehicle wire chart reference for wire colors)
- Connect the BROWN /YELLOW wire of the CH2 T-harness to the wire located at pin 14 of the OBDII connector. (See the vehicle wire chart reference for wire colors)

## STEP 4

- Plug the aftermarket radio harnesses into the aftermarket radio.
- Plug the Data cable to the data port of the aftermarket radio.
- Insert the Audio cable into the iDataLink 3.5 mm audio jack of the aftermarket radio.

## STEP 5

- Connect all the harnesses to the Maestro RR module then proceed to module setup.

**The module is now ready to be used.**

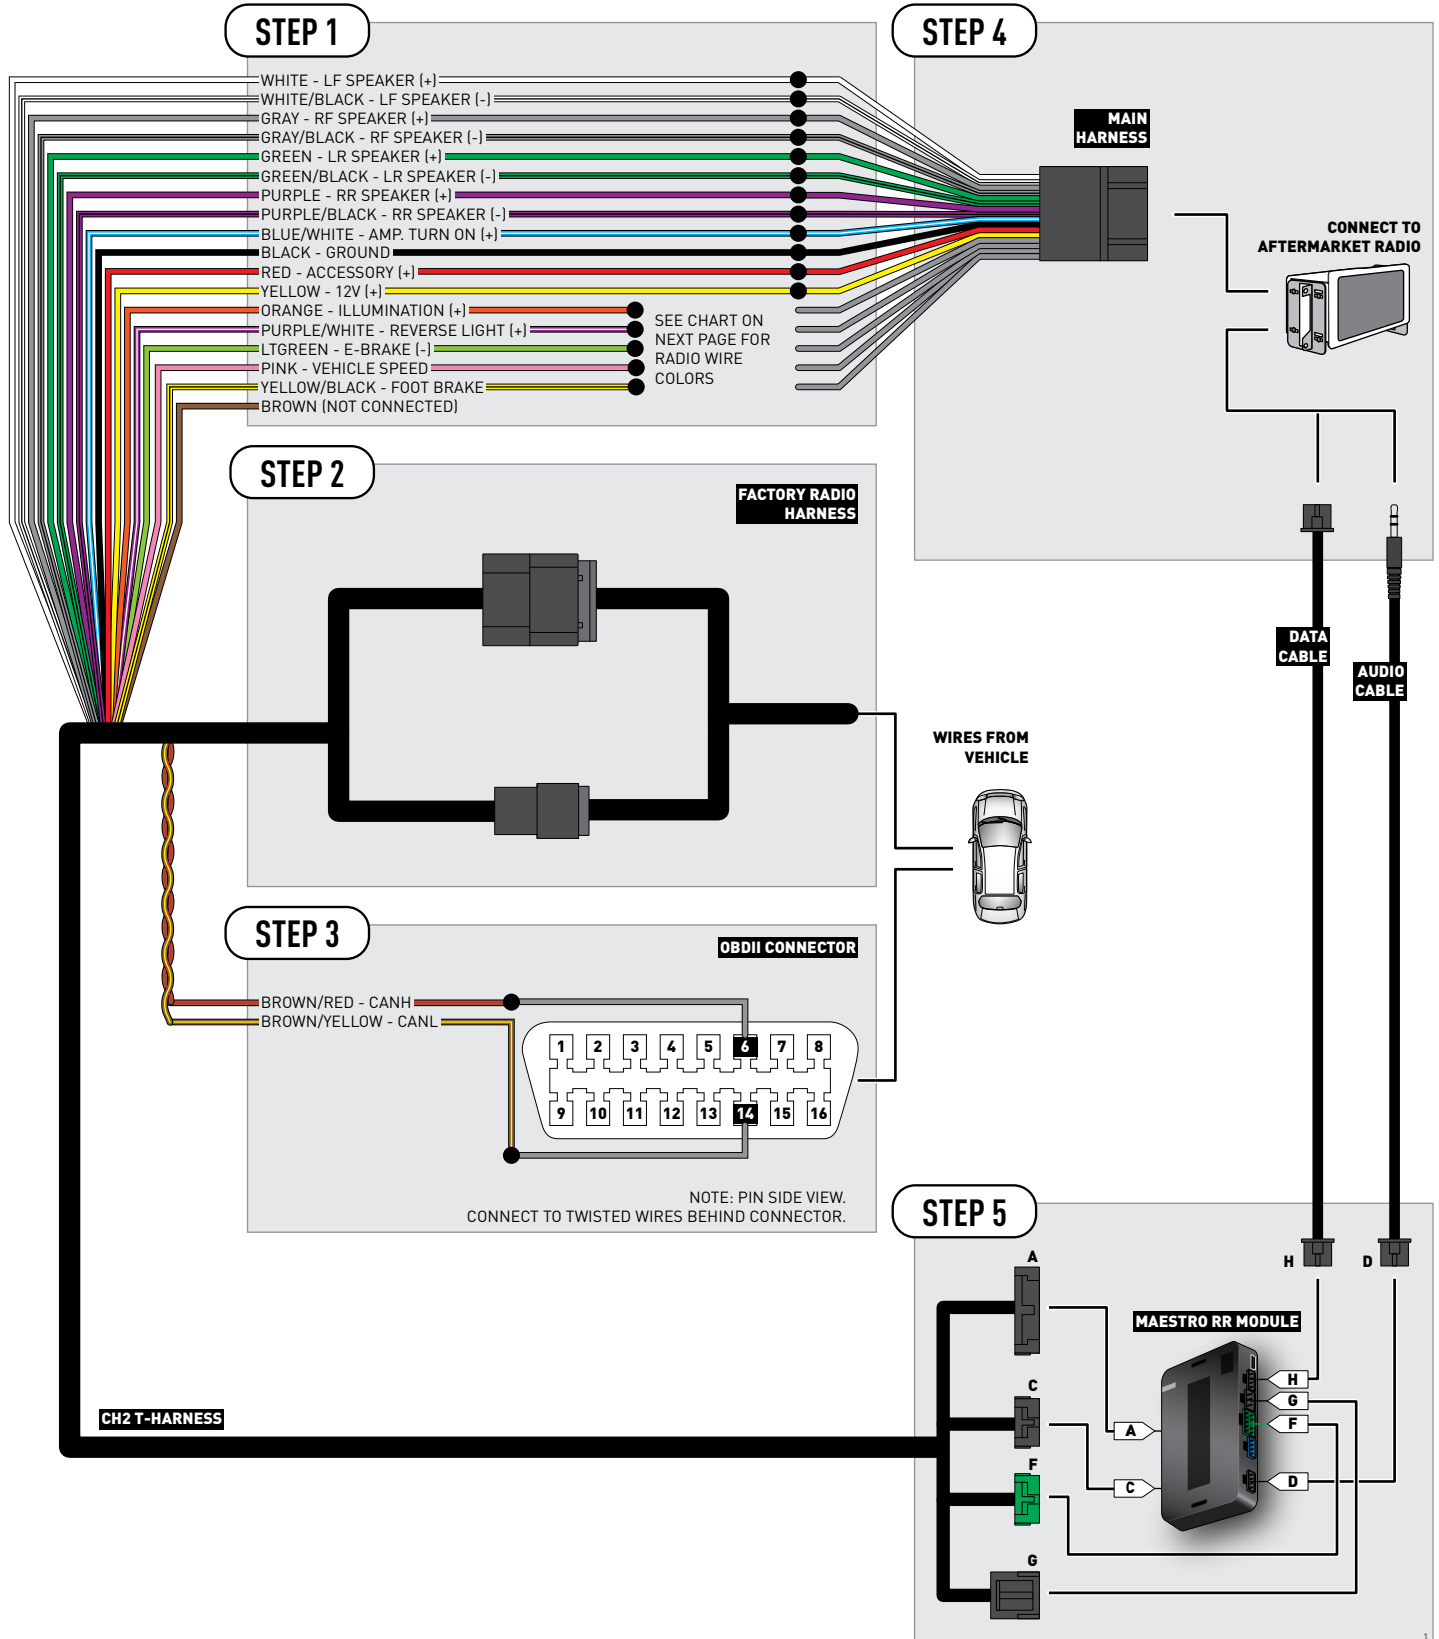

**Insert the aftermarket radio in the dashboard housing and test all the functionalities.**

**Reassemble the dashboard carefully.**

### TROUBLESHOOTING TIPS:

- To reset the module back its factory settings, turn the key to the OFF position then disconnect all connectors from the module. Press and hold the module's programming button and connect all the connectors back to the module. Wait, the module's LED will flash RED rapidly (this may take up to 10 seconds). Release the programming button. Wait, the LED will turn solid GREEN for 2 seconds.
