NOTE

- I 1/2 - Type may vary by vehicle equipment level.
2/3 - Type may be standard key or push to start.
NC - Not covered
- II WARNING: Please advise that the install type numbers have changed since the last revision of this install guide.
- III Type 3 install provides simulated tach output for hybrid vehicles.

A hybrid vehicle might be running without its engine being running.
To determine whether a hybrid vehicle is running or not, look at the instrument cluster, radio and heating system.

“Push to Start” vehicles have a maximum take over time of 45 seconds: for security reasons, during the remote starter runtime, the driver must press the unlock button of the remote starter fob to trigger a 45 seconds time window which will permit him/her to step into the vehicle and press the brake pedal to complete take over.
